## PROJECTS

### Ecommerce Website powered by KNN algorithm for recommendation :

- This e-commerce platform is designed to enhance the shopping experience for farmers and agricultural businesses by integrating a K-Nearest Neighbors (KNN) recommendation system. This intelligent recommendation engine suggests relevant products based on user purchase history and browsing behavior, ensuring that farmers receive personalized recommendations for essential agricultural inputs such as seeds, fertilizers, and equipment.
- Techstack : Django, Sci-kit learn, numpy, pandas, HTML,CSS,JavaScript

### StrayHelp :

- StrayHelp is a platform designed to make rescuing stray animals easier and more efficient. Users can report injured strays by uploading a photo,and the platform will automatically fetch the location from the image metadata. Nearby rescue organizations and volunteers are notified instantly to ensure quick action. Once the rescue is confirmed, the post is marked as resolved and removed.
